Experience

Intern - UI Developer (December 2017 – June 2018)

Jr. Consultant - UI Developer (July 2018 – Present)

I have started my career as Jr. Consultant - UI Developer in **KNOWARTH Technologies pvt. Ltd.**, Ahmedabad. As of now I am handling UI as well as Angular 5 and above versions in multiple projects.

Projects

1. Log Monitoring System. (Angular 5, Node JS, MongoDB, Express JS)

It is based on MEAN Stack which we have developed during the Internship at KNOWARTH. Basically in this project we are reading logs from Apache Server log files Using **NodeJS + ExpressJS** and tail that logs to the frontend which is in **Angular**. All the filters and Searching facilities are available in this product.

Responsibilities:

Front-end Developer as well as Back-end Developer.

2. letmeasQ (Angular 7)

We develop this Product in Angular 7, Node + Express and MongoDB where I manage Frontend in ANGULAR Development as well as Design also.

In this project we are developing a facility like **Stackoverflow**.

Responsibilities:

Design a theme by my own and develop it in Angular 7 and all other Development like Creating components, Manage Routes, httpServices, Pipes, Guard and Interceptors.

3. Human Resource Management System (Liferay 7.0)

This Project was developed in Liferay 7.0 based on JAVA, HTML 5, SASS and JavaScript. It is portal which was built for maintaining in-House HRMS Activities and My Role is Liferay Theme Developer.

Responsibilities:

Create Custom Liferay 7.0 theme, Layouts and Components based on Style guide provided by UX.

4. Kuwait Govt. Website (Liferay 6.2)

It is UI / UX based Project awarded to the KNOWARTH Where I played role of UI Developer.

In which new UI Theme was integrated, which is developed in HTML, SCSS and JavaScript / jQuery.

Responsibilities:

Create Custom Liferay 6.2 theme, Layouts and Components based on Style guide provided by UX.

5. Idea Portal (Drupal 7)

This project was developed in PHP Framework Drupal 7, where I played a role of Theme Developer.

Purpose of this project is to upload the Challenges and User can upload their ideas about the challenge as well as it is used for uploading Reusable components also.

Responsibilities:

Developed Drupal 7 theme according to UX design.

6. Some Wordpress Websites. (Wordpress theming and DIVI Builder)

I developed some wordpress websites in KNOWARTH as per Client Requirements.

Where some websites are developed using custom HTML, CSS and JS

And some are build using DIVI builder and Jupiter Theme Builder.

Responsibilities:

Develop Wordpress theme according to UX Design.

7. Food Order System (Core PHP, MySql)

in this project user can buy any food item online to his home or you can also put a request for Table booking or Pickup from restaurant.

Restaurant owner can manage his food items menu as well as prices, test of food and Food availability.

Project was developed in core PHP.

Responsibilities:

Design and Develop.
