PROJECTS

⬢ **AirSmile**

◇ Clinic (Dentist) Solutions Web portal and Android/IOS Application.

◇ Project Developed in Angular 8 as Front-end and Laravel as Backend with SQL Database.

◇ My role in the projects is to Consume the APIs and Integrate in Angular & Develop User Interface of Web portals

Descreption

◇ Project is developed to solve problems for clinics and users.

◇ There is three type of users in this project : Clinic Owner (Dentist), End User (patient or Customer), Administrator of Project

◇ Clinic can register, provide services, manage dentists and it's availability, manage reviews, manage appointments.

◇ Patient portal and Mobile Application can be used to book appointments against clinics.

◇ Admin can have all rights to manage clinics and users and other master data and have a deep drive of analytics

● AppyHealth

◇ AppyHealth is portal where multiple small clinics to large multi-specialist hospitals are registered.

◇ Project Developed in Angular 8 as Front-end and .Net as Backend with mySql.

◇ My role in the projects is to Consume the APIs and Integrate in Angular & Develop User Interface

Descreption

◇ Project is same as AirSmile but having only one portal for all Physicians and Patients, Here all the types of Physicians are available.

● LetmeasQ (Let me ask)

◇ LetmeasQ is stands for **Let me ask Question** which is portal like stackoverflow.

◇ Project Developed in Angular 6 as Front-end and Node JS as Backend with MongoDB.

◇ My role in the projects is to Consume the APIs and Integrate in Angular & Develop User Interface

Descreption

◇ Project is developed to solve problems of those who have queries or issues in their daily life, so they can ask here and some one who is alredy solved it, they can provide the solution to those problems.

● LTI - Employee Automation

◇ LTI is the project of Larsen & Toubro Infotech which is part of L&T Limited.

◇ Project Developed in Liferay 7.1

◇ My role in the projects is to Develop User Interface, Create Layouts and reusable UI Components for their system.

Descreption

◇ The project Theme is only developed from our side, which is developed for Automate the daily tasks of their Employees.
